

CCDS & Ubyty Solutions Partner to Deliver VoIP-Based Call Center Solutions

Partnership gives CCDS the ability to provide international call center communication services using Ubyty Solutions' VoIP network and technologies.

MONTREAL—August 8, 2007—Call Center Development Services (CCDS) and Ubyty Solutions, Inc. today announced a strategic partnership that gives CCDS the ability to offer its popular Centcom call center services internationally using Ubyty Solutions' VoIP network and technologies.

With this partnership, CCDS will use Ubyty Solutions' global-reaching VoIP network and technology to offer the Centcom virtual call center service to companies around the world. CCDS's Centcom system currently provides call center communication services to hundreds of North American organizations each day.

"Our relationship with Ubyty is great because it will enable CCDS to go global. Ubyty currently supports telephone services in Europe, Asia and South America, which means that we'll be able to supply our services to those areas too," said Sonny Bettan, President and CEO, CCDS.

The Centcom Virtual Call Center provides outbound and inbound communications services to hundreds of companies across North America. Dialing functionality includes predictive, non-predictive and preview dialing, outbound messaging with interactive voice response (IVR) and automatic call distribution (ACD).

ABOUT CCDS

Call Center Development Services is a Montreal-based predictive dialer software developer and call center service provider whose Centcom Virtual Call Center provides inbound and outbound call center services to companies across North America.

ABOUT UBITY SOLUTIONS

Ubyty Solutions Inc. is a telecommunications provider located in Montreal that specializes in Internet protocol (IP) solutions. Ubyty Solutions offers business VoIP communication services, VoIP IP-PBX hosting and integration solutions and IP telephony consulting services.
